Notes

"Among the performances, Pearl, played by Rachel Lauren Baker, was the stand-out. Despite playing the group's outsider, Baker's portrayal of the outwardly strait-laced, respectable widow was captivating and made it difficult to look elsewhere when she took to the stage. Her performance unified the cast, drawing out stronger moments from the others and holding tight to the emotional core of Lawler's work ensured that the play's over-arching themes resonated with the audience. Pearl's realist view of the layoff balances the over-excitement of Ally O'Brien's Olive. The pair were cataclysmic and jarring: a blunt realist who tends to lean more on the pessimistic side and an idealist stuck in the past. The dynamic felt authentic, and the pair played off each other with admirable ease." - What's The Show review of 'Summer of The Seventeenth Doll' 2025
